Product Change Notification

SFAH matte display window

Project number:306289

Version:1

Oct 26, 26

Festo SE & Co. KG

Change description

Technical description:

To reduce scrap in production through an improved molding and handling process for the plastic SFAH window, we will change the window to have a rougher surface.

Identification of changed products (Details):

As a result, the display values may appear slightly duller. This does not affect the readability of the display.

The change applies to all SFAH, FEHA, and KMAT configurations.

Please be aware that during the transition period, it is still possible to receive products with the old version from stock until existing inventory has been used up.

The pictures show the old version on the left and the new version on the right.

Visual change:

Category of change: FORM: X FIT: FUNCTION:

This change will become active in production from: Jun 01, 27
