

A blue car chassis is shown on an automated assembly line. The car is positioned on a conveyor belt, and a large, white, circular robotic arm is positioned above it. The background shows a complex industrial structure with various pipes and beams, suggesting a modern manufacturing facility. The overall scene is brightly lit, with a clean and professional aesthetic.

**Your contact person to the  
Automotive Industry worldwide**

**FESTO**

**Issue 2011**

## **Festo – Your partner to the Automotive Industry**

### **Automation by Festo: Getting cars on the road**

As a partner to the automotive and automotive supplier industry, Festo supports the industry's production processes worldwide. Reliable and efficient handling of sheet metal components inside the press shop plays just as important a role as innovative automation solutions in body assembly. Other objectives include clean preparation of pilot and process air in painting systems and smooth assembly processes. It is plain to see that Festo automation can perform a range of demanding tasks in the automotive industry.

### **Worldwide and yet on your doorstep**

Festo has been developing pneumatic components for use in the automotive industry for more than 45 years. And this on a global scale, through 58 national companies plus additional branch offices in almost 180 countries. This means a maximum presence in all the important areas of application of the car industry, since one important factor of our philosophy is economy of operation: “Think global, act local – flexibility in a mobile world”.

### **More than just products**

To give you maximum support and advice we have a worldwide network of technical consultants for the automotive industry – also in your country. The following brochure will provide you with an overview of our automotive specialists.

Welcome to Festo – Your international industry-specific partner to the automotive and automotive supplier industry.
