

The Festo online shop -
much more than just ordering

Order online and enjoy further benefits!

Do you expect the perfect purchasing process to deliver more than just an ordering facility? If so, then Festo's online shop is the right place for you.

It supports you in almost all phases of your project, whether

- **selection**
- **design**
- **ordering** or
- **after-sales.**

Maximum planning reliability

One platform, one process, one partner for great reliability and ease of working. Integrate your purchasing process with Festo.

Use the added value that our online shop offers:

- All product, price and delivery information on one platform
- Fully integrated in Festo's inventory management system
- Always up-to-date
- Always with the latest order status information

Select products with ease and confidence – the online catalogue

The configurator guides you step-by-step to the right product.

It is divided into

- **basic features** that are needed for a complete configuration, and
- **further product options** that can be additionally selected as required.

Here's how you can keep track at all times:

- Start by choosing the technical features that you have to have.
- Refine your selection. Clear navigation and dynamic graphics make this process really user-friendly, even with very complex products.

Tip

Need further information after you've already ordered a product? Product information, user documentation, manuals, engineering software, firmware and drivers can be conveniently downloaded from our Support Portal.

The screenshot shows the Festo online catalogue interface for a 'Fine/Micro filter MS9-LFM'. The page is titled 'www.festo.co.uk' and includes navigation links for 'GB Home', 'Products', 'Online Shop', 'Services', 'Industries', 'Didactic', 'Support', and 'About Festo'. The breadcrumb trail is 'Compressed air preparation > Filter > Series MS modular and configurable > MS-LFM >'. The main product title is 'Fine/Micro filter MS9-LFM'. Below the title, there are tabs for 'Select features', 'Product list', and 'My favourites'. The 'Select features' tab is active, showing a configuration table for 'MS9-LFM-3/4-B-U-H-DA'. The table lists various parameters and their selected values, such as 'Series: MS Standard', 'Size: 9', 'Function: LFM Fine and micro filter', 'Connection size: 3/4 Thread G3/4', 'Degree of filtration: B 1 µm', 'Bowl: U Metal bowl', 'Condensate drain: H Semi-automatic', 'Filter exchange sensing: DA Differential pressure display', 'Mounting type: Without mounting bracket', and 'Alternative flow direction: Flow direction from left to right'. On the left side, there is a 'Catalogue' sidebar with a search bar and a list of products under 'Compressed air preparation' and 'Filter', including 'Series MS modular and configurable', 'MS-LFM', and various sizes (4, 6, 9, 12). Below the product list is a 'My favorites' section. On the right side, there is an 'Add to basket' button and a list of actions: '2D/3D view', 'Accessories', 'Documentation', 'Data Sheet', 'Display Overview', 'Save as', 'Reset', 'Valid selection', 'request your price', and a part number '552940'. At the bottom right, there is a 'W - One week delivery time' badge and an 'Exemplary representation' image of the filter.

Always bang up-to-date – product information and data

Here's real added value for you: continuously updated information on all products on one platform. This enables you to work quickly and efficiently, without having to waste valuable time on laborious searches.

Always online for you:

1. **CAD downloads** for all common CAD programmes
2. **Accessories**
3. **Documentation**
4. **Technical data**
5. **Product illustrations**
6. **Up-to-date prices**

Tip

Our new FluidDRAW P5 (professional) software makes designing even easier. It combines the smooth preparation of circuit diagrams with entirely new features such as electric circuit and terminal diagrams, custom product databases, translation database for multilingual projects, the preparation of assembly drawings and many more.

Up-to-date prices and delivery time – the basket

Simply place the components you want directly in the basket. This contains all the order information such as up-to-date prices and delivery times.

You can add products to the basket using:

- the Festo part number
- the type code
- your own part number

Adding components using the type code will take you to the catalogue. Use the convenient configurator provided to define the specification.

If you order using your own part number, this product will be instantly referenced to the right Festo product and added to the basket. Prerequisite: these part numbers must be stored in Festo's system.

The price and respective delivery time displayed will always be up-to-date since you're accessing Festo's inventory management system directly.

Tip Checking your preferred delivery date

The option to enter your preferred delivery date directly and check availability in the basket gives you flexibility when it comes to planning your requirements and ensures that you never lose track of what's going on.

Keeping tabs on your orders – order tracking

The order tracking facility enables you to track all of your orders at any time, whether you ordered by phone, fax or e-mail. This means that you always know where they are – another tool to ensure planning reliability.

- Find your orders using your order number, the Festo order number or simply by searching by part number and period.

- All orders corresponding to your customer number will be displayed. This means that you can also view your colleagues' orders.
- Click the “Details” column to see the status of each item in your order.
- Click the delivery number to automatically track the order with the delivery company, e.g. UPS.

Tip

Simply click “Repeat Order” to copy the entire parts list or individual products from earlier orders back into the basket. This saves you having to define the configuration again at a later date.

Quick Search Tool

The Festo Quick search tool is to assist in quickly navigating your way through the online catalogue. You can select products and access the online shop to place an order.

Whether you require dimensions, installation or operating instructions, CAD models, data sheets, or recommended accessories they can all be found conveniently in the one place.

Quick search tool features:

- Fast access to the Festo online catalogue
- Direct connection to online shop for product ordering
- Quick access to selection & dimension tools
- 2D, 3D CAD & pneumatic symbol download
- Product data sheet download
- Product accessories information
- Engineering tools - (Gripper selection, shock absorber selection & more)
