Handheld for the CPX Valve Terminal...Fast diagnostics and more!

Festo Corporation, a global leader in automation solutions, is pleased to announce the introduction of our new “handheld programming device” for the CPX Valve Terminal, the fastest way to carry out parameter settings, configurations, and diagnostics.

Festo plug & work® -No programming required and no additional software.

Easy to work with - Clear-text display for commissioning, status display and fast search for current faults.

Easy-to-use “Find” function - Identifies causes of sporadic faults using a diagnostic history of the last 40 fault events with time stamps.

Festo Corporation

Clear-text diagnostics - For module and channel-oriented faults.

Robust design - High degree of protection.

Always up-to-date - With WML technology.

Password protection option - For operator/machine safety and diagnostic messages via fieldbus.

Features:

- Advance commissioning by monitoring/forced-setting of inputs and outputs without a fieldbus master/PLC
- Test function for parameter settings, e.g. fail-safe outputs or switch-on delay for inputs
