## Electric Actuator EGC

### Toothed Belt and Ball Screw

Festo announces the addition of the Electric Actuator EGC to the family of electromechanical actuators. The EGC is designed for high dynamic speeds and high rigidity. This modular actuator can be used as an individual component adapted to third-party motors or as a complete system provided by one source – Festo.

#### Broad Range of Options

Toothed belt or ball screw actuator  
Different screw pitches available  
Sizes 70, 80, 120, 185 (ball screw)  
Sizes 50, 70, 80, 120, 185 (toothed belt)

#### Performance Highlights

- High speeds and feed forces
- High loads and torques
- Maximum rigidity

In addition to these impressive features, the EGC offers an excellent price-performance ratio. Due to the high performance and rigidity of the EGC, a smaller size actuator can be used to save both space and costs.

#### **News Release**

**Festo** is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with 56 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

Please contact Cheryl Sabatelli at Festo Corporation for high-resolution photos for publication.
