C-slot Cylinder Sensor - SMx-10M

The cylinder sensor SMT/SME-10M is used in factory automation, particularly to detect the position of magnets fitted to pneumatic drives. This cylinder sensor is only approx. 25mm long and highly functional but is nonetheless carefully designed down to the last detail.

Features:

- Compact Size; Fits all applicable Festo C-slot drives.
- Secure mounting due to new and improved CAM mounting mechanism
- Short-circuit protection for reed variants
- Protection classes of IP65/68.

Wide Diversity of Variants

- PNP/NPN switching outputs
- Energy chain + Robotic cable quality
- M8 or open-end cable variants
- Completely configurable variants including cable lengths up to 30 m.

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with 56 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performance, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.
