

# How to use single EPLAN macros

## Steps to insert a single EPLAN macro from Festo

1. Select a product with EPLAN macro, e.g. CMMD
2. Press button "2D/3D view" in the navigation on the right.
3. Choose CAD system "EPLAN" and select "EPLAN P8 2.0 Single (\*.ems)"  
**Note:** You need to be logged in for this action.
4. Press button "Download" and save .zip file to disk.

## CAD for Motor controller CMMD-AS-C8-3A #561406

<b>Product</b> Type <b>CMMD-AS-C8-3A</b> Part number <b>561406</b> <input type="button" value="Add to basket"/>	<b>User settings</b> Name <input type="text" value="Mr_EPLAN"/> E-mail <input type="text" value="Mr_EPLAN@mycompany.com"/>	
<b>CAD systems</b> <ul style="list-style-type: none"><li>Adobe PDF</li><li>AutoCAD</li><li>CATIA</li><li><b>EPLAN</b></li><li>Inventor</li><li>OneSpace Designer</li><li>Pro/ENGINEER Wildfire</li><li>SolidEdge</li><li>SolidWorks</li><li>Unigraphics</li><li>... other CAD systems</li><li>Neutral 3D</li><li>Neutral 2D</li></ul>	<b>File formats</b> <ul style="list-style-type: none"><li><b>EPLAN P8 2.0 Single (*.ems)</b></li><li>EPLAN P8 2.0 Package (*.zw5, *.zw6)</li></ul> <input type="button" value="Help"/> <input type="button" value="Save settings"/>	<b>Get data</b> <input type="button" value="Request e-mail"/> <input type="button" value="Download"/> <input type="button" value="Direct to CAD system"/>  <input type="button" value="CAD Preview"/>

5. Unpack the .zip file.
6. Insert the .ems file to a EPLAN page. You can use drag and drop.

This only inserts the macro without part information. If this is needed it is necessary to download the complete package (\*.zw5/\*.zw6). This package contains all macros of a group and the according parts database.
