

# One-way flow control valves

Festo core product range  
Covers 80% of your automation tasks

Worldwide:  
Superb:  
Easy:

Always in stock  
Festo quality at an attractive price  
Reduces procurement and storing complexity

Generally ready for shipping ex works in 24 hours  
Held in stock in 13 service centres worldwide  
More than 2200 product

Generally ready for shipping ex works in 5 days  
Assembled for you in 4 service centres worldwide  
Up to 6 x 10<sup>12</sup> variants per product series

# One-way flow control valves

Key features

## Function

Flow control or one-way flow control valves regulate the piston speed of pneumatic drives during advance and return strokes. This is done through suitable restriction of the flow rate of compressed air in exhaust air or supply air direction. With the one-way

flow control valve GRLA or GRLZ, the flow control function works in one direction only (exhaust air or supply air); the non-return function works in the opposite direction. With the flow control valve GRLO, the flow control function is active in both directions.

The flow control function creates an adjustable annular gap inside the valve. This gap can be increased or decreased by turning the knurled screw or slotted head screw. The required restriction can be set with the help of this adjustment component.

**Note**  
The documentation for the flow control valves can be found at [www.festo.com/catalogue](http://www.festo.com/catalogue)

## General information

### Standard nominal flow rate $q_{nN}$

The standard nominal flow rate  $q_{nN}$  is the flow rate based on standard conditions at an operating pressure of  $p_1 = 6$  bar and an output pressure of  $p_2 = 5$  bar, measured at room temperature  $t = 20$  °C.

### Exhaust air one-way flow control function

### Supply air one-way flow control function

### Standard flow rate $q_n$

The standard flow rate is measured at an operating pressure of  $p_1 = 6$  bar and an output pressure with respect to atmospheric pressure ( $p_2 = 0$  bar).

### Flow control function in both directions

### Flow measurement circuit

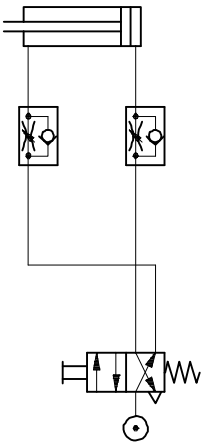

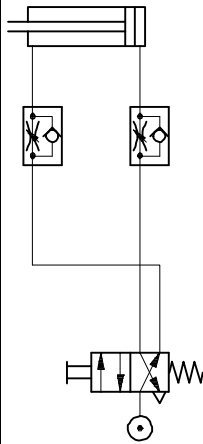

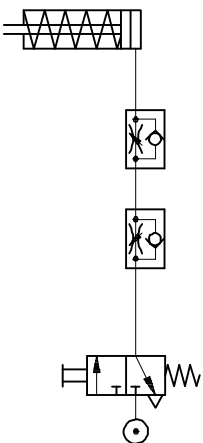

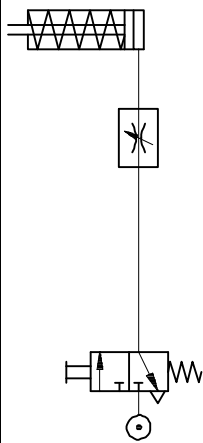

$p_1$  Operating pressure  
 $p_2$  Output pressure

1 Supply port (pneumatic connection 1)  
2 Working line (pneumatic connection 2)

# One-way flow control valves

Key features

Flow control functions and range of applications			
Application		Description	
<b>Double-acting cylinder with one-way flow control valve</b>			
Exhaust air one-way flow control function		Supply air one-way flow control function	
	<p>Speed adjustment through exhaust air flow control. Uncontrolled supply air and controlled exhaust air move the piston between air cushions (improves motion, even with load changes).</p>		<p>Adjustable speed during advance and return strokes. The flow rate is identical in both directions.</p>
<b>Single-acting cylinder with one-way flow control valve</b>		<b>Single-acting cylinder with flow control valve</b>	
Exhaust air and supply air one-way flow control function		Flow control function in both directions	
	<p>Adjustable speed during advance and return strokes. The flow rate can be adjusted differently for both directions.</p>		<p>Speed adjustment through flow control on both sides is often applied in the case of single-acting or small cylinders. The benefit of this application lies in its simplicity.</p>

## Application examples

Mini slide SLT with one-way flow control valve, standard

Flat cylinder DZF with one-way flow control valve, mini

## GRLA/GRLSA/CRGRLA/GRLZ

GRLA - 1/8 - QS - 6 - - - D

Type	
Exhaust air one-way flow control function	
GRLA	One-way flow control valve, elbow outlet
GRLSA	One-way flow control valve, elbow outlet with rotary knob
CRGRLA	One-way flow control valve, elbow outlet, corrosion-resistant
GRXA-HG	One-way flow control valve, function combination
Supply air one-way flow control function	
GRLZ	One-way flow control valve, elbow outlet

Pneumatic connection 2	
M3, M5, 1/8, 1/4, 3/8, 1/2, 3/4	Male thread

Pneumatic connection 1	
Connection type	
-	Female thread (connection size as for connection 2)
QS	Push-in connector QS
PK	Barbed connector
Tubing O.D. or tubing I.D.	
3, 4, 6, 8, 10, 12	Tubing O.D. with push-in connector QS
3, 4, 6	Tubing I.D. with barbed connector PK

Adjustment component	
-	Slotted head screw
RS	Knurled screw

Flow rate characteristic	
LF	Low flow
MF	Medium flow

Generation	
B	B series
C	C series
D	D series

## VFOC

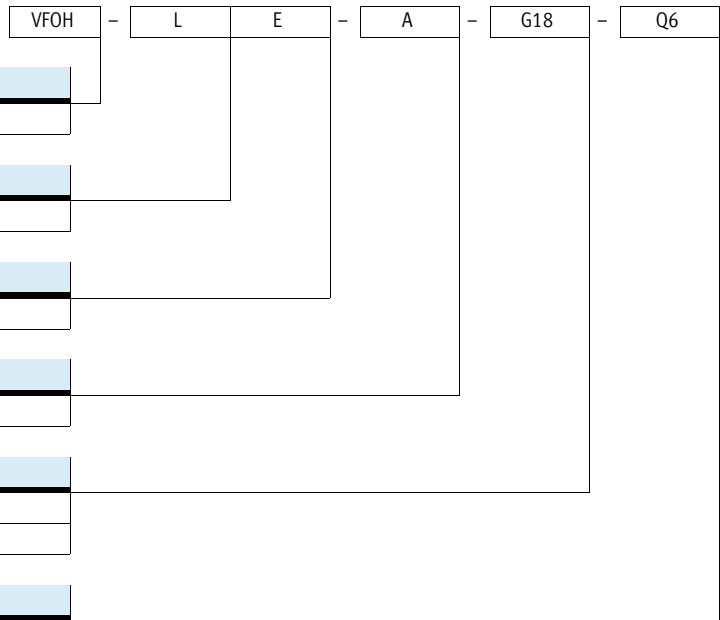

Type	
VFOC	One-way flow control valve, elbow outlet

Valve function	
S	Supply air one-way flow control function

Pneumatic connection 2	
S4	Push-in sleeve QS-4
S6	Push-in sleeve QS-6

Pneumatic connection 1	
Q4	Push-in connector QS-4
Q6	Push-in connector QS-6

## VFOH-LE

Type	
VFOH	One-way flow control valve

Design	
L	L-shaped outlet

Valve function	
E	Exhaust air one-way flow control function

Adjusting element	
A	External hex

Pneumatic connection 2	
G18	Thread G $\frac{1}{8}$
G14	Thread G $\frac{1}{4}$

Pneumatic connection 1	
Q4	Push-in connector QS-4
Q6	Push-in connector QS-6
Q8	Push-in connector QS-8
Q10	Push-in connector QS-10

# One-way flow control valves GRLA/GRLZ, standard

Technical data – Push-in connector QS, metal

One-way flow control function

- - Flow rate  
100 ... 1,580 l/min
- - Temperature range  
-10 ... +60 °C
- - Operating pressure  
0.2 ... 10 bar

- Can be swivelled 360° around the screw-in axis after mounting

General technical data – GRLA

# One-way flow control valves GRLSA, standard

Technical data – Push-in connector QS, metal

One-way flow control function  
Exhaust air

-  Flow rate  
0 ... 450 l/min
-  Temperature range  
-10 ... +60 °C
-  Operating pressure  
0.2 ... 10 bar

This one-way flow control valve offers the ideal conditions for optimum and easy setting of the flow rate in a unique design.

There are two setting options:

- 1 Gradual for preselection of the flow range in 5 stages via rotary switch: A, B, C, D, E

- 2 Infinitely variable for precision adjustment using internal hex via a scale marked from 0 to 10

General technical data		
Valve function	Exhaust air one-way flow control function	
Pneumatic connection 2	G $\frac{1}{8}$	G $\frac{1}{4}$
Pneumatic connection 1	QS-6	QS-8
Adjustment component	Rotary knob with scale and internal hex	
Actuation type	Manual	
Type of mounting	Screw-in	
Mounting position	Any	
Nominal tightening torque [Nm]	3.5 ±20%	11 ±10%

Operating and environmental conditions		
Operating pressure complete temperature range [bar]	0.2 ... 10	
Operating medium	Compressed air in accordance with ISO 8573-1:2010 [7:4:4]	
Note on operating/pilot medium	Operation with lubricated medium possible (in which case lubricated operation will always be required)	
Ambient temperature [°C]	-10 ... +60	
Temperature of medium [°C]	-10 ... +60	
Storage temperature [°C]	-10 ... +40

## One-way flow control valves GRXA, function combination

Technical data – Push-in connector QS, metal

FESTO

One-way flow control function  
Exhaust air

-  - Flow rate  
130 ... 280 l/min
-  - Temperature range  
-10 ... +60 °C
-  - Operating pressure  
0.5 ... 10 bar

Function example:

The function combination consists of a one-way flow control valve and a piloted non-return valve. Exhaust air flow control is active as long as a pilot signal from pneumatic connection 21 is applied. If no pilot signal is applied, the valve shuts off the exhaust air. The compressed air flows unthrottled through the non-return valve in the supply air direction.

- Stop function and speed setting in one housing
- Swivel pilot connection 21 perpendicular to screw-in direction
- Additional pilot connection 1 for crossover interconnection, e.g. for stop function with pressure failure  
→ Function example

General technical data			
Valve function		Exhaust air one-way flow control function
