

Mounting plates

Ready-to-install solutions – Mounting plates and assemblies

- Machine-specific pre-assembly of pneumatic and electrical components on support plate
- Tubing and wiring included
- Defined interfaces for simple installation directly in the system

General information

Festo mounting plates are used for the function-specific pre-assembly of pneumatic and electrical components. They support the individual components and are integrated directly into the system concept.

Each mounting plate has a customised design based on the respective application and with a customised combination of components. In addition to Festo components, third-party components

can be integrated as required. The mounting plate is supplied ready-to-install – fully connected and tested. It can be installed directly in the machine. Suitable mounting attachments

are already fitted to or integrated into the support plate. The pneumatic and electrical connections are also provided. These simply have to be connected to the machine.

Technical data

- Customised support plate shape
- For a wide range of industrial applications
- Support plate available in different materials, e.g. sheet steel, stainless steel, etc.
- Application-specific combination of components
- Fully assembled, connected and wired
- Defined interfaces
- Use of the latest innovations and technologies
- Ready-to-install: All steps from engineering and assembly to quality inspection are carried out by Festo specialists
