

Industrial Automation

Mechatronic skills and Festo automation products are utilized in production applications throughout the world.

Industrial Applications

Automotive

Food and Packaging

Electric Light Assembly

Paper and Printing

Biotech/Pharmaceutical

Process Control

Industrial Processes

Design and Engineering

Assembly and Production

Quality and Inspection

Mechatronics

Teach Mechatronics from technology fundamentals to complete factory automation

Start

PLC Programming

Learning Systems

Hardware:

- Easy Port
- PLC Training Kits
- PLC Applications

Software:

- EasyVeep
- Commercial PLC Programming Software

Fundamentals

Training Packages

Hardware:

- Fluid Power
- Sensors
- Electricity/Electronics
- Mechanical Systems

Software:

- FluidSIM®
- LVSIM®-HYD and LVSIM®-PNEU
- eSeries E-Learning courses

Automation Processes

MPS

Hardware:

- Work Stations

Software:

- Mechatronics Assistant
- CIROS® Mechatronics

Robotics

Robots

Hardware:

- Robots
- Robot Workcells

Software:

- CIROS® Robotics
- CIROS® Programming
- CIROS® Studio
- RoboCIM

Mechatronics

FMS/iCIM

Hardware:

- Conveyor
- Robots
- Machining Center
- Advanced Mechatronics System

Software:

- CIROS® Automation Suite
- CIROS® Production

Mechatronics

Mechatronics is the synergistic combination of mechanical engineering, electrical engineering, electronics, information technology and systems thinking utilized in the design of products and automation processes.

Festo Didactic products provide the ideal environment for Mechatronics training. Our broad array of products, including hardware, simulation software, web-based training products, and extensive curriculum, combine to provide the educator with the most comprehensive industrial-based training programs available worldwide.

Technical training objectives include the ability to:

- Analyze functional relationships in mechatronic systems
- Manufacture mechanical components
- Follow information and energy flow in electrical, pneumatic and hydraulic sub-systems
- Plan and organize work flow
- Commission, troubleshoot, and repair mechatronic systems
- Communicate using industrial network protocols, including DeviceNet™ and Profibus
