Solenoid valves MH2, MH3, MH4, fast-switching valves

FESTO

Key features

Fast-switching valves from Festo: it's not just the switching that's fast

Pros that switch as fast as 2 milliseconds

Speed, dynamic response and precision are more sought after than ever before in modern automation. The solution lies in pneumatic components. The result: shorter cycle times in return for comparatively low investment costs for the components. Maximum process reliability, sturdiness and service life are guaranteed.

High speed in production

The fast-switching valves are a technological treat for all things high-speed. With switching times ≤ 2 ms and a repetition accuracy ≤ 0.2 ms, they represent the pinnacle of what is technologically achievable worldwide – even in 24-hour continuous operation with over 500 million cycles.

Simple to retrofit in existing systems, or setting the pace for newly designed systems. Naturally compact, including maximum component density. Indispensable for sorting parts using an air ejector, in flap control systems, for gluing, dispensing, packaging and, of course, also suitable for pick & place vacuum applications, for example (continuous holding not possible).

Faster switching

Extremely short switching times enable short cycle times. Extremely precise switching makes it possible to control the timing of process sequences accurately.
High output and very good machine utilisation are included. Excellent repetition accuracy of switching times ensures consistent processes, improves process and part quality and reduces rejects and rework.

Faster installation

With a variety of connection options such as thread or integrated push-in tubing connectors and a range of mounting options for individual valves or valve manifold assembly, the installation can be perfectly adapted to on-site circumstances while the footprint is kept to a minimum.

Fast-switching valves can be used directly in the application without additional protective measures. As a result, very short pneumatic lines guarantee short signal paths and fast response times.

Key features

Fast-switching valves from Festo: it's not just the switching that's fast

- Variants with and without fast-switching electronics as 3/2-way and 5/2-way valves
- Extremely short switching times with maximum repetition accuracy and outstanding service life
- Directly actuated poppet valve with degree of protection IP65

Advantages for designers

- Very high cycle rates
- Extremely short cycle times
- Maximum repetition accuracy
- Suitable for vacuum thanks to directly actuated poppet valve (time limited)
- Flexible design principle
- Direct activation via standard PLC possible
- Direct mounting in the application with IP65 protection

Advantages for purchasers

- Everything from a single source
- Low ordering costs
- No additional mounting components
- No costs for additional power outputs
- Use of standard PLCs
- Increased system productivity

Advantages for installation

- Easy installation
- Direct pneumatic connection via integrated tubing connections
- Reduced assembly costs with pre-assembled cables
- No additional protection required thanks to IP65

Key features

Fast and precise – sturdy and economical

High performance, process stability and extremely easy handling

Fast-switching valves MH increase switching frequencies and improve process and part quality with their excellent repetition accuracy.

Integrated: the fast-switching electronics

- All 3/2- and 5/2-way valves are available with built-in fast-switching electronics
- This enables constant dynamic response independent of temperature or supply voltage fluctuations
- With Festo plug & work, installation is easy, and no additional electronics or pneumatics know-how is necessary

Optimised: systems and processes

- On-site assembly thanks to IP65 – not sensitive to dust and humidity
- Direct activation with 24 V DC/1 A – use of PLC standard outputs
- With an extremely long service life of 500 million cycles, and continuous three-shift operation with no need for maintenance, optimum efficiency comes as standard!

Key features

- Repetition accuracy ≤ 0.2 ms for accurate dispensing/bonding, for example
- Switching time ≤ 3 ms for short cycle times and very quick response characteristics
- 10 mm width for compact assembly
- Choice of connections as an individual valve, semi in-line or sub-base variant, enabling need-optimised installation
- Degree of protection IP65 enables direct mounting in the application without additional safeguarding
- Easy installation via direct activation from the standard PLC with 24 V DC/1 A

Fast valves and an optimised control chain – two guarantees for success

To generate speed in pneumatics, the valve and cylinder must be perfectly matched. The correct combination can result in a 30% increase in efficiency. Cylinders with small diameters and short strokes need fast valves!

Length means losses – focus on tubing

In terms of pneumatic efficiency, short tubing is a key factor. Reducing the tubing length from 1 m to 0.5 m, for example, improves the max. possible flow rate by 20%. A tube length greater than 2 m results in losses of up to 50%. In this case it is recommended to use tubing of the next size up.

Small and nearby – the clever alternative

Short tubing with a small diameter is ideal for mounting valves close to the cylinder. The small and light fast-switching valves are suitable for direct mounting in the application, thanks also to their degree of protection IP65. By using them together with smaller and lighter fittings, the weight is reduced, too. This results in particular in an improvement in the efficiency of moving systems.

Small and fast – a good combination

The switching time plays a crucial role with small cylinder volumes, especially with short-stroke cylinders. In the adjacent example, the combination with a fast-switching valve is 30% faster. In concrete terms, this means that the cylinder controlled using the fast-switching valve is already in the end position before the cylinder with the universal valve even begins to move. This equates to a significant increase in both the efficiency and the economy of the system, especially when taking into account that the two valves have comparable space requirements and weight, and the fast-switching valve uses less air and lasts 10 times as long!

Product range overview

Voltage
24 V DC

Pressure
–0.09 ... +0.8 MPa

Temperature range
–5 ... +60 °C

General technical data		
Valve function		3/2 way, single solenoid[1]
Design		Pressure relief poppet valve
Overlap		Negative overlap
Sealing principle		Soft
Reset method		Mechanical spring
Actuation type		Electrical
Type of control		Direct
Flow direction		Reversible with restrictions[2]
Exhaust air function		Can be throttled
Manual override		Non-detenting
Mounting position		Any
Width	[mm]	14
Grid dimension	[mm]	19
Note on grid dimension		Minimum distance between the valves is 5 mm
Nominal width	[mm]	3
Standard nominal flow rate	[l/min]	200
Type of mounting		Via through-hole
Pneumatic connection		Connecting thread G1/8
		Push-in connector for tubing O.D. 6 mm
Product weight	[g]	120

1) Can be used as a 2/2-way valve by sealing port 3 or 33
2) Slight leakage can occur in the pressure range –0.8 bar to +0.5 bar.

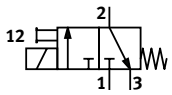
Datasheet – Sub-base valve

Function



Voltage
24 V DC

Pressure
–0.09 ... +0.8 MPa

Temperature range
–5 ... +40 °C

General technical data		
Valve function		3/2 way, single solenoid[1]
Design		Pressure relief poppet valve
Overlap		Negative overlap
Sealing principle		Soft
Reset method		Mechanical spring
Actuation type		Electrical
Type of control		Direct
Flow direction		Reversible with restrictions[2]
Exhaust air function		Can be throttled
Manual override		Non-detenting
Mounting position		Any
Width	[mm]	14
Grid dimension	[mm]	19
Note on grid dimension		Minimum distance between the valves is 5 mm
Nominal width	[mm]	3
Standard nominal flow rate	[l/min]	200
Type of mounting		On PR rail, via through-hole
Pneumatic connection		Sub-base
Product weight	[g]	120

1) Can be used as a 2/2-way valve by sealing port 3 or 33
2) Slight leakage can occur in the pressure range –0.8 bar to +0.5 bar.

Datasheet – Sub-base valve

Operating and environmental conditions			With fast-switching electronics	Without fast-switching electronics
Operating medium			Compressed air to ISO 8573-1:2010 [7:4:4]

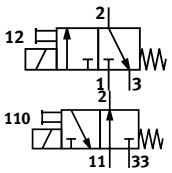
Datasheet – Individual valve

Function



Voltage
24 V DC

Pressure
–0.09 ... +0.8 MPa

Temperature range
–5 ... +60 °C

General technical data		
Valve function		3/2 way, single solenoid[1]
Design		Pressure relief poppet valve
Overlap		Negative overlap
Sealing principle		Soft
Reset method		Mechanical spring
Actuation type		Electrical
Type of control		Direct
Flow direction		Reversible with restrictions[2]
Exhaust air function		Can be throttled
Manual override		Non-detenting
Mounting position		Any
Width	[mm]	18
Grid dimension	[mm]	24
Note on grid dimension		Minimum distance between the valves is 6 mm
Nominal width	[mm]	4
Standard nominal flow rate	[l/min]	400
Type of mounting		Via through-hole
Pneumatic connection		Connecting thread G1/4
		Push-in connector for tubing O.D. 8 mm
Product weight	[g]	270

1) Can be used as a 2/2-way valve by sealing port 3 or 33
2) Slight leakage can occur in the pressure range –0.8 bar to +0.5 bar.

Datasheet – Individual valve

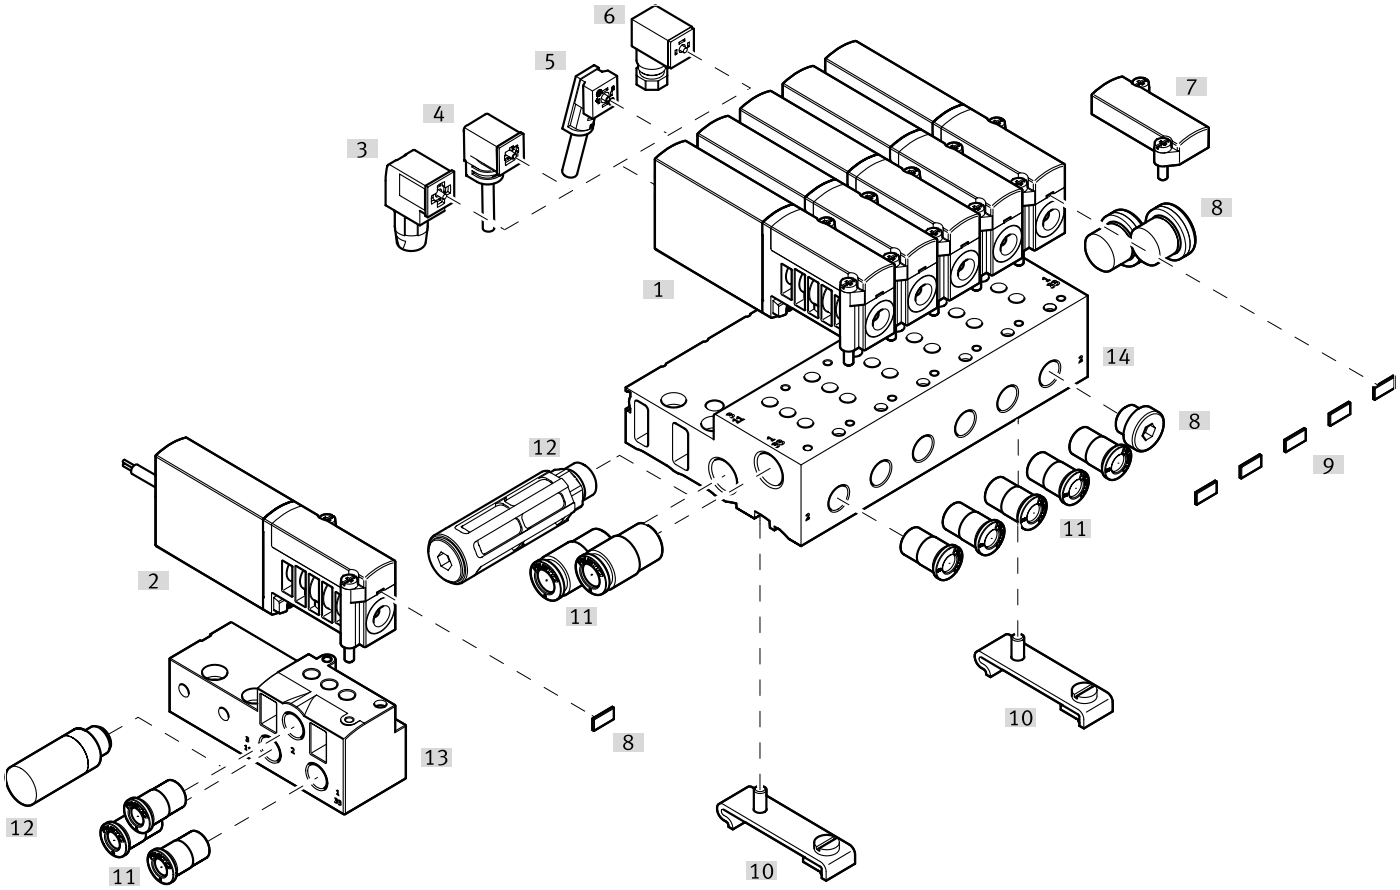
Peripherals overview – Sub-base valve

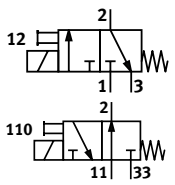
Connection with plug vanes – Connection with moulded-in cable



Designation		Type	Description	→ Page/Internet
[1]	Sub-base valves	MHA4	With plug vanes	108
[2]	Sub-base valves	MHA4-...-K	With moulded-in cable, IP65	108
[3]	Plug socket	MSSD-EB-S-M14	With insulation displacement connectors	109
[4]	Plug socket with cable	KMEB-1	PVC cable, with or without LED	109
[5]	Plug socket with cable	KMEB-2	PUR cable, with or without LED	109
[6]	Plug socket	MSSD-EB	With clamping screw	109
[7]	Cover plate	MHAP4-BP-3	For sealing vacant positions	108
[8]	Blanking plug	B	For sealing unused ports	110
[9]	Inscription labels	MH-BZ-80X	For identifying the valves	110
[10]	DIN rail mounting	CPV10/14-VI-BG-NRH-35	For mounting the manifold block on DIN rails to EN 60715	109
[11]	Push-in fittings	QS	For connecting tubing with standard O.D.	110
[12]	Silencer	UC	For mounting in exhaust ports	110
[13]	Individual sub-base	MHA4-AS-3-1/4	For sub-base valves	108
[14]	Manifold block	MHA4-PR...-1/4	For sub-base valves	108

Datasheet – Sub-base valve

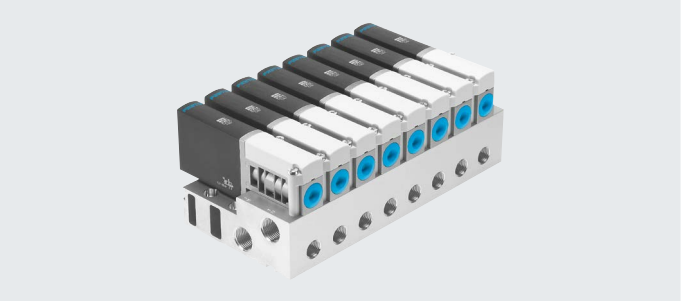
Function



Voltage
24 V DC

Pressure
–0.09 ... +0.8 MPa

Temperature range
–5 ... +40 °C



General technical data			
Valve function			3/2 way, single solenoid[1]
Design			Pressure relief poppet valve
Overlap			Negative overlap
Sealing principle			Soft
Reset method			Mechanical spring
Actuation type			Electrical
Type of control			Direct
Flow direction			Reversible with restrictions[2]
Exhaust air function			Can be throttled
Manual override			Non-detenting
Mounting position			Any
Width		[mm]	18
Grid dimension		[mm]	24
Note on grid dimension			Minimum distance between the valves is 6 mm
Nominal width		[mm]	4
Standard nominal flow rate		[l/min]	400
Type of mounting			On PR rail
Pneumatic connection	1, 11, 2, 3, 33		Sub-base
Product weight		[g]	270

1) Can be used as a 2/2-way valve by sealing port 3 or 33
2) Slight leakage can occur in the pressure range –0.8 bar to +0.5 bar.

Datasheet – Sub-base valve

Operating and environmental conditions			With fast-switching electronics	Without fast-switching electronics
Operating medium			Compressed air to ISO 8573-1:2010 [7:4:4]	
Note on the operating/pilot medium			Lubricated operation possible (in which case lubricated operation will always be required)	
Operating pressure		[MPa]	–0.09 ... +0.8	
		[bar]	–0.9 ... +8	
		[psi]	–13.05 ... +116	
	Reversible	[MPa]	–0.09 ... +1	
		[bar]	–0.9 ... +1	
		[psi]	–13.05 ... +14.5	
Ambient temperature		[°C]	–5 ... +40	
Temperature of medium		[°C]	–5 ... +40	
Corrosion resistance class CRC[1]			2	
CE marking (see declaration of conformity)[3]			To EU EMC Directive[2]	–
			To EU RoHS Directive	–
UKCA marking (see declaration of conformity)[3]			To UK EMC regulations	–
			To UK RoHS regulations	–
Certification			c UL us - Recognized (OL)	c UL us - Recognized (OL)
			RCM	–
Cleanroom class			Class 6 to ISO 14644-1	
Shock resistance			Shock test with severity level 2 to FN 942017-5 and EN 60068-2-27	
Vibration resistant			Transport application test with severity level 2 to FN 942017-4 and EN 60068-2-6	

1) More information www.festo.com/x/topic/crc
2) For information about the area of use, see the EC declaration of conformity at: www.festo.com/catalogue/mh2 → Support/Downloads.
If the devices are subject to usage restrictions in residential, commercial or light-industrial environments, further measures for the reduction of the emitted interference may be necessary.

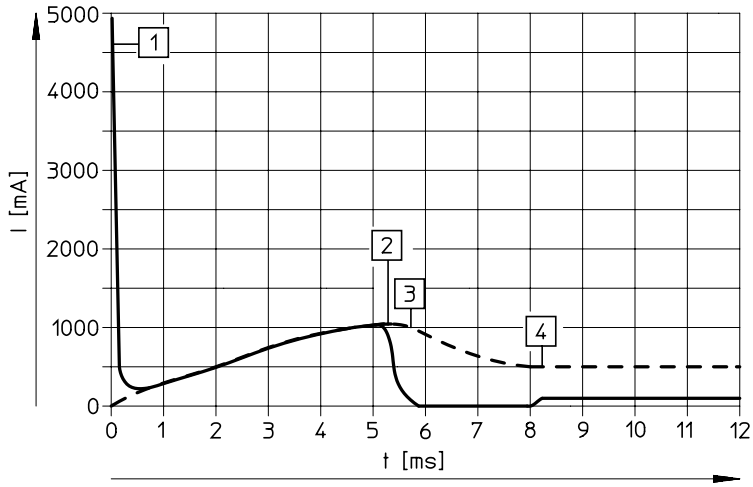
Electrical data			With fast-switching electronics	Without fast-switching electronics
Electrical connection			Plug, 2-pin or cable	
Operating voltage		[V DC]	24	
Permissible voltage fluctuations		[%]	±10	
Power consumption		[W]	8.5 (high-current phase)	5.6
		[W]	2.125 (low-current phase)	–
Reverse polarity protection			Bipolar	–
Duty cycle		[%]	100	100
Additional functions			Spark arresting	–
			Holding current reduction	–
			Protective circuit	–
Degree of protection to EN 60529			IP65	IP65

Switching times and frequencies			With fast-switching electronics	Without fast-switching electronics
Switching time	On	[ms]	3.5	10.5
	Off	[ms]	3.5	5
Tolerance for switching time	On	[%]	+10 ... –30	–
	Off	[%]	+10 ... –40	–
Switching time variation from 1 Hz upwards		[ms]	0.3	–
Maximum switching frequency		[Hz]	210	120

Materials	
Housing	Die-cast zinc, coated
Cable sheath	PUR
Seals	HNBR, NBR
Screws	Galvanised steel
Note on materials	RoHS-compliant
LABS (PWIS) conformity	VDMA24364-B1/B2-L

Datasheet – Sub-base valve

Current curve for valves with fast-switching electronics (MHA4-MS1H)



Internal current in the coil
External current in the supply line

[1] Capacitor charging
[2] Controlled coil current 1 A
[3] Holding current reduction
[4] Controlled holding current 0.5 A
