

Optimisation!

At Festo, systematically lean procurement means:

Minimising costs – from the identification of needs to the transmission of orders – and improving performance and process reliability at the same time. By targeted optimisation of warehousing and ordering process.

There are several options for reducing process costs:

Optimising processes

Eliminate complex process steps, avoid waiting times and design reliable processes by, for example, using an EDP-supported ordering process.

Needs-orientated stocks

Identify and reduce unnecessary stocks to bring down fixed capital.

The customised service for efficient ordering and logistics.

Fitting QS-F-8 1500 pc.

Targeted Reliable Economical

Festo Logistics Optimisation Service

Reducing procurement costs – maximising services

Low value items have a significant influence on procurement and stock management costs. In general, they represent a small share of total material costs but a large share of the materials to be managed.

Festo's Logistics Optimisation Service helps reduce the costs of stock management and the ordering process while increasing process reliability at the same time.

Festo supports your logistics concept by providing indepen-

dent modules from the Logistics Optimisation Service.

Select the suitable solution for your processes of logistics for Festo products.

Module 1: Analysis of the product range and the logistics process

- What products are ordered, how often and in what quantities?
- Simplifying or expanding the product range
- Highlighting potential for optimisation
- Planning of optimal storage and order quantities, as well as order cycles
- Annual statistics on your order behaviour

→ For details, see PSI 912.13

Module 2: Optimising the product identification

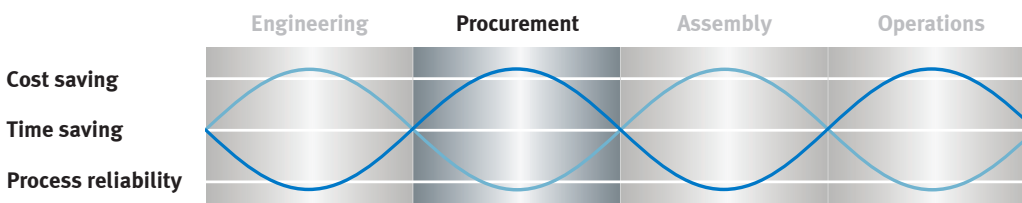

- Stock labels with product image make identification easier
- Encoding customer-specific information in all common bar code formats and languages facilitates integration in the customer's existing system

→ For details, see PSI 912.11

Module 3: Optimising the ordering process

- Capturing pre-defined order quantities by using bar code scanners
- Simple scanner data import into the Festo Online Shop
- 1-step ordering – no waiting times between request, price information and order

→ For details, see PSI 912.11
