Project data

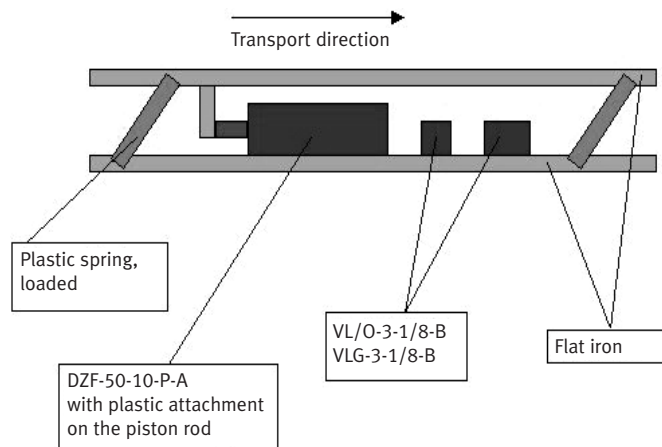

- Press lines at VW Wolfsburg
- Project location:
Wolfsburg, Germany
- Festo contact:
G. Betting, Festo Germany
- Special solution for press lines
developed with the support
of Festo

Special solution for press lines

Areas in which Festo products are used:

- Removal of stamping waste
from presses
- Stamping waste is transported
by vibration
- Device is in use in various sizes
- Space-saving solution, thanks
to compact design

Some of the Festo products used:

DZF cylinder

- Flat-design cylinder with oval
piston rod for installation in
cramped conditions

VL/O valve

- Robust valve for harsh
conditions
- Pneumatically actuated
- Can also be used for high
frequencies
