

Save time and money in your assembly process with kits and sub-assemblies from Festo.

One order, one position, one delivery, one package ready for assembly. Clear advantages in regard to savings in assembly time, purchasing, logistics, and documentation. For maximum peace of mind – guaranteed components and functionality. A unique service – only from Festo!

Efficiency in packages to suit you: whether PrePack, PreAssembly or Ready-to-install pneumatics

The effect remains the same – Festo Services reduce the overall cost of your pneumatics.

Increased peace of mind –

Because all required parts e.g. for a subassembly are to hand and function-tested in advance.

Purchasing made simpler

Through a reduction in administration

Logistics made simpler

One package for one kit or assembly reduces the number of stock locations and picking of individual parts from your stores.

Reduced assembly time

Through the supply of kits and subassemblies – ready to mount/assemble to your specification.

The concept of Easy Assembly Services significantly reduces your goods inwards and storage time because you only have one unit to handle. Your installation

and assembly time is reduced to a minimum – Festo plug and work®. An intelligent packaging concept offers safety in transport and the possibility of configuring

individual components or assemblies in the best possible way for assembly on your machine.

Service measures

The Principle: increased complexity, increased benefit

Step 1: Delivery of individual components

You receive Festo products as usual – high quality and high reliability included.

Step 2: PrePack Service

You receive the required combination of many individual parts under one part number and delivered as one package.

Step 3: PreAssembly Service

Over and above the PrePack Service, the components are delivered already assembled.

Step 4: Ready-to-install pneumatics

You define the requirements of your pneumatic application, Festo supplies the solution – Festo plug and work®. For complex applications, Festo can also help with the development and deliver fully functional, tested and preassembled units.
