**MPA 2/2-way vacuum valve**

- **Vacuum zone**
- **Pressure zone**
- **Valve code „I“**
- **Filter**
- **Vacuum pump**
- **Exhaust**
- **Ejection pulse**
- **Pilot pressure**
- **Operating pressure for cylinder movements**

**Vacuum valve (code „I“)**

- Switch external vacuum (e.g. by vacuum pump)
- Vacuum pressure zone and standard pressure zones for cylinder operation can be combined on one valve terminal
- Use separation seal S
- MPA2 valves for high vacuum performance
- Use a vacuum filter to avoid a blocking of the valve.
